LAW PRACTICES TRUST US.

One of our largest client bases, the legal industry relies on ExchangeDefender to mitigate risks of cyber and email attacks. We secure your law practice, and protect your clients by eliminating the danger of data breach or ransomware.

CYBER ATTACKS ON **LEGAL** **SECTOR** ON THE RISE

Legal practices are big targets for hackers due to their access to sensitive information, and severe lack of security.

1 in 4

law firms have experienced a security breach of some kind. Even more have had malware or viruses according to a 2019 American Bar Association survey.

36K

is the projected average cost of a data breach for a small practice in the legal sector. At least 31% of customers terminated their relationship afterwards.

61%

of ransomware victims in the legal sector were Law Firms in 2020. It is the highest of the legal profession, with Courts, and Legal Services coming in second.

94%

of malware and ransomware attacks were delivered by email in 2020. There are new malware and viruses being discovered every day.

OUR MOST POPULAR SOLUTIONS FOR LEGAL

ExchangeDefender protects you from hacked email accounts, phishing scams, and data breaches. Our legal clients rely on us to keep sensitive information safe, and to ensure that they can communicate securely via email.

EMAIL SECURITY

ExchangeDefender PRO is our multi-layered email security suite that protects against SPAM, viruses, malware, ransomware, spoofing, phishing attacks, and more.

ARCHIVING & EDISCOVERY

Assures full archiving of all inbound, outbound, and internal email for regulatory compliance. It also include fast eDiscovery search and compliance manager controls.

CORPORATE ENCRYPTION

Enables you to send and receive encrypted messages by email, url, or text message. It is easy to use, can auto-detect sensitive data, and offers real time reporting.

5 REASONS TO SECURE YOUR LAW PRACTICE RIGHT NOW!

#1. Increase of data breaches

Law firms pose a higher risk for data leaks due to their business nature of storing and sharing sensitive information.

#3. Hacked email accounts

There is a hacker attack happening every 39 seconds, and email is the main use of communication for most professional services.

#5. Ethical & regulatory obligations

To comply with the ABA's rule 1.6: Confidentiality of Information, lawyers must make a reasonable effort to secure client information.

#2. Phishing scams

3.4 billion fake emails are sent each day. In 2020, 74% of organizations in the United States experienced a successful phishing attack.

#4. Lack of securing sensitive data

Less than half of all law firms in the U.S use some form of encryption software with custom policies to protect their client's privacy.
